

700CP CASE PACKER

The **700CP** is a cost effective fully automatic case packaging solution. It includes all the necessary infeed/discharge conveying, collation and tooling required for your application. Our history proves that it is applicable for a wide variety of industries including dairy, pharmaceutical, food, beverage, bakery, automotive, oil, chemical, adhesive, paper, etc. This simple system applies commonsense & dependable designs that focus on your bottom line.

HIGHLY CUSTOMIZABLE

The 700CP provides an enormously flexible platform for your ever changing needs. The top load design allows for quick, simple and accurate tooling changeovers between package sizes and types.

SPEED & PRECISION *(without the price tag)*

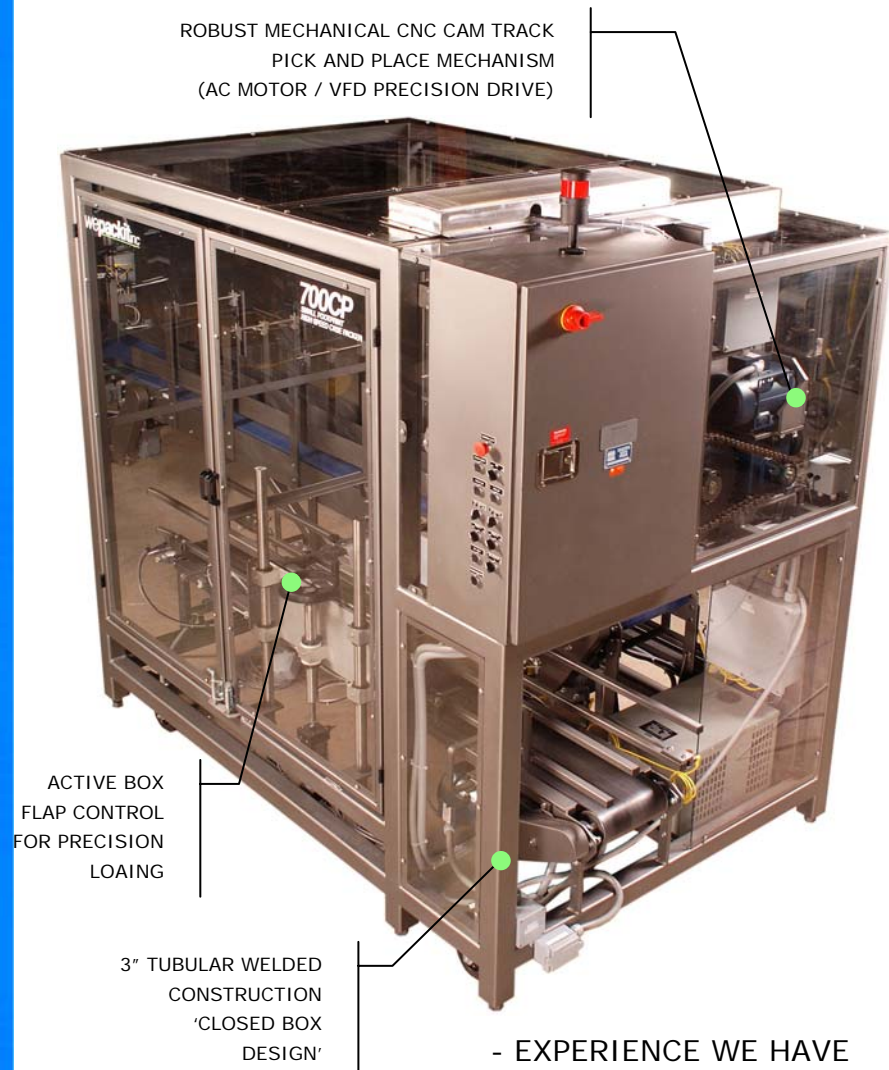

Without the use of over-complex, burdensome and costly servo technology, the 700CP is able to achieve moderate to high speed case packing without the costs. Example –

- Bottles & Cans (400 per minute)
- Cartons (240 per minute)
- Dairy Tubs (120 per minute)
- Thermoform Trays / Clamshells (90 per minute)
- Large Sacs / Side Gusseted Bags (60 per minute)

PICK-UP ENVELOP – 18" x 32" @ 10-12 cycles/min.

OUR DESIGN, CONSTRUCTION & SUPPORT PHILOSOPHY

- Robust components for demanding environments
- Apply the appropriate level of technology for the application (avoid servos/cost where possible)
- Study the package and focus on product registration
- Automation is a means to an end; cases-out-the-door is what counts for customers
- Strive to deliver the bests possible R.O.I.
- Service & support the client without any compromise

- EXPERIENCE WE HAVE

It's easy to automate using servo technology. Everybody does it. The difficult part is accomplishing the same thing with simpler technology, without sacrificing precision, speed and reliability. Our goal is precision case packing automation with a **shortened Return on Investment**. The BASE 700CP achieves speeds without servos and maintains precision through the use of dependable and easily understood commercial AC motors & VFD's. Great detail and technology is applied to product in-feed, collation and registration. Consistent and reliable registration is what delivers high machine efficiency.

STANDARD FEATURES

- FULL INTERLOCK SAFETY GUARDING
- ANTI-CORROSION PAINT FINISH
- PLC CONTROLLED
- OFF THE SHELF PNEUMATICS
- UL/CSA APPROVED ELECTRICAL
- SOLENOIDS (115VAC)

UTILITIES - AIR

- 220/3/60 NEMA 12 – 5CFM (80PSI) STD.

SYSTEM OPTIONS

- FULL STAINLESS STEEL
- PRODUCT LAYER PAD
- LEFT OR RIGHT HAND
- TOUCHSCREEN H.M.I.
- 480V OPTION
